

Date

Monday 16 July 2007

Title of session

Workshop 2 - Models for Geospatial Rights Management

Name of presenter/chair

Chair: Graham Vowles, Principal Consultant, Ordnance Survey, GB

Presenter: Roland Wagner, SDI Architect, University of Münster, Germany

Rapporteurs

Colin Henderson, Ordnance Survey and Selena Patton, Defence Geographic Centre

Presentation title: Technical Protection

When protecting creative content, copyright frameworks are used to protect the author's interests, and licenses are created around these to protect those rights.

Technology provides the implementation to manage these licenses with users unaware of what is occurring behind the scenes.

The key to technical implementation is to standardise the licenses to fit different business models.
