Cambridge Conference – The Postscript

What a brilliant conference we had!

Hopefully, all our delegates managed to reach home safely and have warm and happy memories of their time in Cambridge. We would be interested to hear your feedback about the conference. No, we are not looking for compliments, but would appreciate any comments you have about things that worked well, or badly, for you.

We hope you enjoy the enclosed CD that contains photographs and the five daily Conference Newsletters that were essential reading each morning at breakfast.

Conference documents

There has been much for the organising team to do since the conference, including finalising a huge number of documents, of various types, to put the conference on record. These include podcasts of the plenary sessions, rapporteur notes, presentations and photographs. Most of these are now on the website

www.cambridgeconference.com, but if anyone has difficulty in downloading the information required, please do let the Team know, and we will send them to you on CD. Please also let us know if you did not receive a copy of the official conference photograph: we will be happy to post it on to you.

Conference Resolutions

The Conference had some very worthwhile outcomes with Vanessa Lawrence, in her closing address, referring to the importance of capturing data for multiple use, the development of the reputation of NMOs, the use of modern technology, the sharing of knowledge, the promotion of the importance of maps and a number of specific items relating to Africa.

Just one more time...

We would like to acknowledge the support of our conference sponsors, without whom the conference would have far fewer 'trimmings', would cost quite a lot more – or both.

With best wishes, until we meet again

The Cambridge Conference 2007 Team
