

Authors' update to paper 4A.5

Authors' note

A significant portion of this paper was originally prepared as a chapter (on funding SDIs) in the forthcoming book "SDI Africa: An Implementation Guide", the publication of which is sponsored jointly by The United Nations Economic Commission for Africa, the Global Spatial Data Infrastructure Association, EIS-AFRICA, International Institute for Geo-Information Science and Earth Observation (ITC), and more than a dozen African specialists. The book is due for release in the fall of 2003.

Additional reference

See [Lance, 2003] for more detailed explanations of the specific African examples used to illustrate and clarify the models for emerging nations

With respect to "References" section, pages 16 to 18 the additional reference is as follows:
